

SUSTAINABLE LABORATORY

CHECK LIST

A SUSTAINABLE LABORATORY...

Is a workplace where **EVERYONE** has an awareness of their impact on the environment

Is environmentally minded when purchasing all products used in the laboratory

Turns off equipment after use. Shuts down toilet lights, bay lights and computers (including monitors) when absent for over 45 minutes

Does not leave water running unnecessarily

Reuses and Recycles **ALL** clean paper product waste using the recycling bins. Prints and photocopies double-sided where possible and shreds paper for reuse

Aims to use less chemicals and always uses a spill tray

Does not pour chemicals down the sink but disposes of them according to waste management procedures

Recycles **ALL** clean glass (except Schott and Pyrex)

Aims to use non-disposable laboratory ware as much as possible and minimise consumption of disposable laboratory ware

Turns fume cupboards off and lowers sash when not in use. Does not store chemicals in fume cupboards
